

HUMAN HERPESVIRUS 6A AND 6B TRANSFER FACTORS FOR THE  
TREATMENT OF CHRONIC FATIGUE SYNDROME AND MULTIPLE  
SCLEROSIS

5 Abstract of the Disclosure

The present invention provides transfer factors that  
confer cell-mediated immunity to Human Herpesvirus-6A  
and Human Herpesvirus-6B. The invention also provides  
10 pharmaceutical compositions comprising the transfer  
factors and methods of treating abnormalities in a  
subject using the transfer factors.
